Buying Guide for Clocks

You can buy clocks for every room in the house and, let's face it, we always need to know what the time is.

If you need a bit of help getting up in the morning you really must get an alarm clock – there are loads to choose from so the choice is yours. Choose from the traditional wind

up variety to the modern digital. Batteries are included wherever applicable.

A wall clock is always a great addition to a living room because it's not only a way of telling the time it's also a decorative item. The same applies to mantle clocks and there are some lovely ones to choose from.**Pets Beds & Blankets**

Pets are a part of the family so we need to keep them happy and comfortable. Buy blankets and beds that are soft and cosy and pets will love them.

Buy machine washable ones so you can keep them clean and free from pet hair and dust. Washing also helps in the battle against fleas.

If you have two cute puppies or kittens why not get them a bed each so they feel really loved and special. You could even get a bed for the living room so your pet can watch TV in comfort and one for the bedroom so he doesn't try and get onto your bed in the middle of the night!
