7) Laparoscopic removal of Gall Bladder stones and various abdominal tumours (general surgery)

8) Endoscopic nasal and microscopic ear surgeries (ENT)

In view of the rising cost and/or lack of readily available medical care in USA, UK and other western countries, increasing number of people are seeking medical treatment in India which offers comparable, or in some cases, even better medical treatment at a reasonable cost. Unlike, in USA or UK, you don't have to wait for days or sometimes even months to get medical treatment, when you arrive at our facility in India.
