[www.chocosnow.com/games/paradoxion/](http://www.chocosnow.com/games/paradoxion/)

"Paradoxion is a true gem for those who like to solve sophisticated logic puzzles!"

Core rules are simple - each level you must clear the board of all elements (like Orbs and Gems) using inventory contents. Elements need to be arranged in standard combinations to be eliminated, for example, Orbs need to be arranged in lines. What is most interesting is that when combination blasts - nearby elements can be shifted by the blast. This ultimately leads to fascinating chain reactions of elements' blasts!

So, itâ€™s end. In next Part we will see last seven games - Pax Galaxia, Snowy: Space Trip, Meteor, Star Blaze, Xeno Assault 2 and Zzed.
