Nobody wants to look like a nerd. Fortunately, teeth straightening alternatives have come a long way since the days of heavy metal wires and brackets. There is a new ways that you can close your tooth gap without the use of bulky headgear.

You can now still maintain a professional look while closing your tooth gap at the same time. The new option is a removable band called "Teeth Effects" from the company Teeth Gap. Teeth Gap patients wear removable clear compressor bands that wrap around the two teeth with the excess space between them. The bands slowly pull the teeth together closing the tooth gap.

Teeth Gap has oral hygiene benefits because you can remove the bands to eat, drink, brush or floss your teeth. The bands are nearly invisible making it easy to fit in rather than calling attention to a mouth full of wires. Another benefit that makes Teeth effects the best alternative is the price. It is by far the cheapest way to close your gap. Teeth Gap customers save 100s of dollars from using teeth effects rather than going to a dentist.

So if you are afraid to smile, rest easy. Now there is an affordable solution to close your gap and boost your self confidence.

Please visit <http://www.teethgap.com> to close your gap simply by wearing a band around your teeth.
